**Date / Place of birth**  
02/21/06  
Richmond, Virginia

## Profile Summery

Full Stack Developer with hands-on experience building responsive, user-focused web apps using React, Node.js, and MongoDB. Passionate about front-end development and specializing in React to create seamless, engaging user experiences. Completed a Full Stack Development program at TripleTen Israel, where I developed real-world projects and honed my skills in modern web technologies. I bring strong communication skills from previous customer service experience at Jclay Studio and the ability to collaborate effectively with diverse teams. Always eager to learn, solve problems, and write clean, maintainable code that makes a difference.

## EXPERIENCE

### Jclay Studio, Jerusalem, Israel — *Retail Sales*

October 2022 - January 2024

- Served as the first point of contact for customers, offering guidance and ensuring a positive studio experience
- Scheduled appointments, managed inventory, and provided customers with creative materials
- Maintained a clean and organized sales floor and work area to meet presentation standards
- Opened and closed the store independently, handling all required procedures and end-of-day tasks
- Developed strong communication, time management, and customer service skills in a fast-paced environment

## EDUCATION

### Triple Ten, Israel — *Certificate of Completion*

October 2024 - July 2025

Completed an intensive full stack development course covering front-end and back-end technologies. Built responsive web applications from Figma designs using HTML, CSS, JavaScript, React, Node.js, and MongoDB. Gained hands-on experience through project-based learning and real-world development workflows.

## SKILLS

HTML  
CSS  
JavaScript  
React  
Node.js  
Express.js  
MongoDB  
Git  
GitHub  
Postman  
VS Code  
Figma  
REST APIs  
Responsive Design

## Yerushalayim Torah Academy, Israel — *High School Diploma*

September 2022 - June 2024

GPA: 3.47

### PROJECTS

#### **news-explorer-frontend** — *React, JavaScript, CSS, Rest APIs*

[Github](#)

Developed a responsive web application that lets users search for the latest news articles by keyword using a third-party News API. Implemented a dynamic UI for displaying articles, a “Save Article” feature, and simulated backend functionality for user authentication and article management.

#### **WTWR (What to Wear)** — *React, Node.js, Express, MongoDB, JavaScript, CSS*

[Github](#) (Front End)

[Github](#) (Back End)

A full-stack weather-based clothing recommendation app. Built with React and Express, the app shows outfit suggestions based on live weather data. Includes user authentication, profile management, and the ability to add or delete clothing items via modals. This was my first full React and back-end integration project using MongoDB.

#### **se\_project\_aroundtheus** — *HTML, CSS, JavaScript, REST APIs*

[Github](#)

Created an interactive, Instagram-style web app with user profiles, image cards, like and delete functionality, and modals. Designed the UI with HTML/CSS, then progressively added JavaScript features like API calls, form validation, and dynamic content. This was my first large-scale JavaScript project, and it greatly boosted my confidence in front-end development.

#### **se\_project\_coffeeshop** — *HTML, CSS*

[Github](#)

Built a responsive coffee shop website based on a layout specification. Developed a navigation bar, integrated YouTube videos using `iframe`, and implemented a working contact form for booking tables. Strengthened understanding of semantic HTML and structured layouts.
